POWER UNITS

TRAINING CENTER

Optimize the operation of your APUs
Keep your team trained to increase your APU availability!

DEDICATING OUR EXPERIENCE TO YOUR SKILLS

Safran Power Units team designs training course offerings to help you reach the level of competency you need.

The main Training Center is located in Toulouse (France).

- We can also provide training in your premises or other Safran Power Units sites upon request.
- Teaching methods include hands-on work with time to practice your new skills.

> We can offer you 3 different levels of training, as described below:

LEVEL 1

This level includes simple operations (specific qualifications not required) without specific maintenance tools. Operations are performed with the APU installed on the aircraft.

LEVEL 2

This level includes complex maintenance tasks (requiring specific qualification) that may need specific tooling or equipment. Operations can be performed on aircraft or on the APU in a workshop environment.

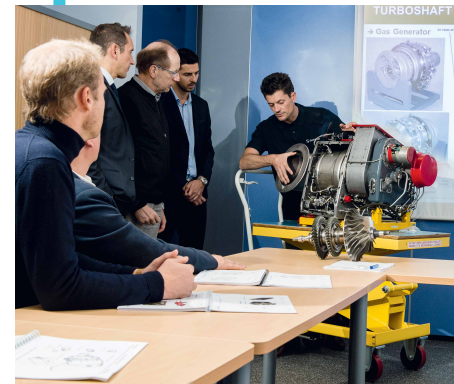

LEVEL 3

This level includes heavy maintenance tasks that require specific tooling, training and equipment. The work is performed in a maintenance center.

We can also offer you customized training courses adapted to your needs. Our instructors speak English, Spanish and French.

> Our training assets:

- Fully equipped facilities and training classrooms.
- A wide range of power systems.
- An opportunity to experience live troubleshooting on a test bench, allowing you to combine classroom and live APU experiences.
- A visit of the Safran Power Units site including touring the factory, repair facilities and more...
- Discussions with the Customer Support team, chief engineers, technical publication team...
- A limited number of trainees for each course to facilitate practical work and discussions.

Each training session integrates troubleshooting and operation on actual system in the test cell.

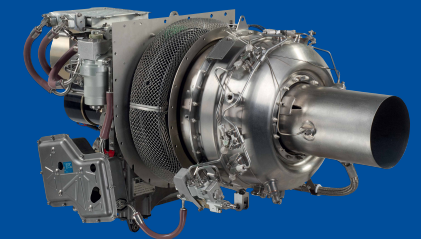

HOW DO I SIGN UP?

> By email or telephone:

- Tel: +33 (0)5 61 37 55 00
- Training Center contact: training.spu@safrangroup.com

> Please, provide the following information:

- The engine version and level of course required.
- The language of the training course.
- The desired period of the course.
- The location (Safran Power Units sites or your premises).
- Your contact details.

Your skills, enriched by new knowledge, demonstrations, and practical course work, will achieve the level of excellence required by the aeronautical activity!
